Executive Summary

The G 20 Citizen Dialogue took place on June 14 at the IAE Business School in Pilar.

The workshop was an expression of public participation in which the discussion of issues with a local approach allowed deep consideration and making recommendations to the G20 on their impact on a global scale.

More than 30 participants invited by the municipality of Pilar discussed for 4 hours the guiding questions posed by the international organizers, IFOK and Citizen Network.

The solutions to the guiding questions have been summarized in challenges and recommendations for their implementation.

The overarching topics, leading to passionate discussions were environmental sustainability, inclusive education, based on family transmitted values; international support for countries fighting actively corruption and unethical public officers; cities and universities developing technologies for green cities; support for more public private partnerships (PPP); and technology.

June 16th, 2017 - Pilar, Buenos Aires, Argentina

C. Methodology

**¿What are the measures that the G20 can take to ensure "growth taking into account social and ecological needs?"
What is the most important challenge for us ?**

How can we harmonize these components of sustainability so that there is no imbalance between them?

How can the G20 agenda of 2030 contribute to implementing sustainable development in aspects such as:

- **Industrial conversion**
- **Use Of water resources**
- **Waste management**
- **Environmental sanitation (sewage and drinking water)**
 - **Prevention and treatment in health services**
 - **Local adaptation to climate changes**

What are the advantages of strengthening international cooperation while respecting cultural and regional identity and diversity?

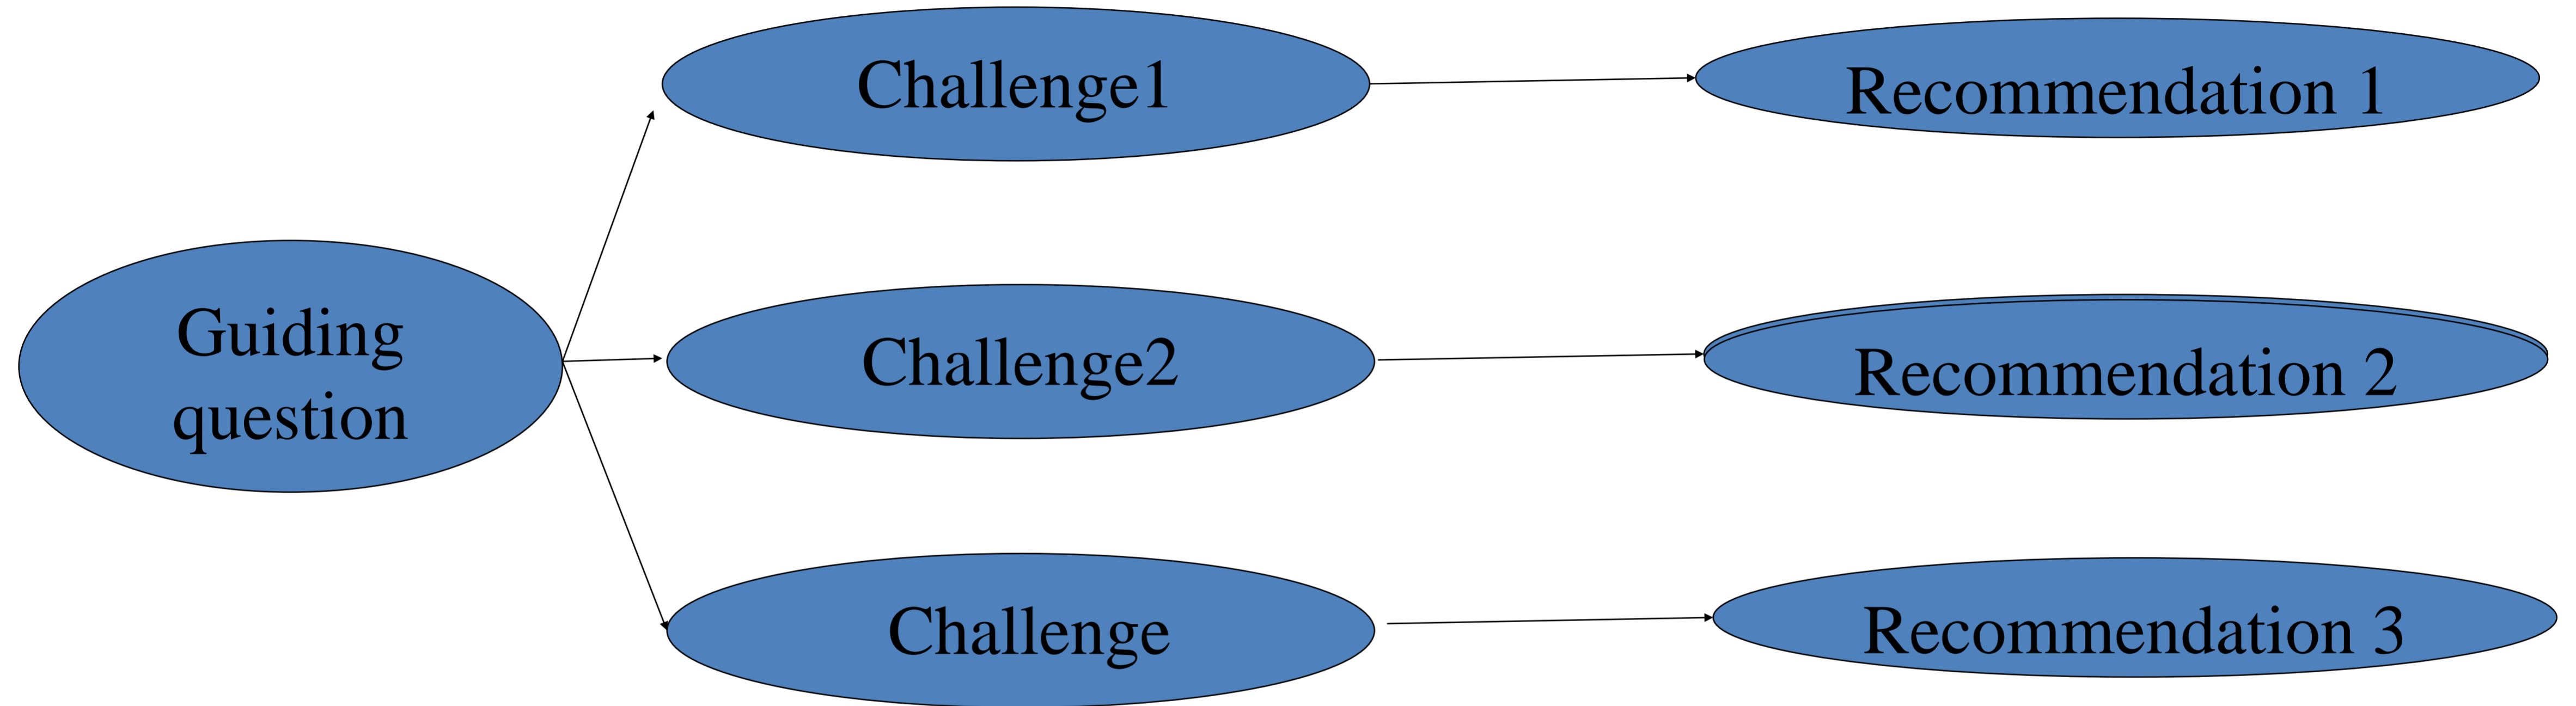

- What are the most critical challenges of globalization and how can we address them?
 - How can international cooperation help solve these challenges?
 - How to include socially the local, regional and international migrants?
 - What cultural and regional traditions are important to us and how to integrate them into the challenges of globalization?

How can the G20 political leaders ensure that the global benefit expands to all sectors of society?

How do we generate a global framework that ensures that the benefits of sustainable development reach everyone?

How can international cooperation within the G20 contribute to these principles?
